UNCOMPROMISING QUALITY  
CUSTOM SOLUTIONS  
OVER 30 YEARS EXPERIENCE

*Performance Driven Cartoners - Built for the Future with the Pride of the Past*

**PMP NEW EXTENDED FRAME "INLINE" HAND LOAD CARTONER PROVIDES A UNIQUE APPROACH TO SOLVING CUSTOMER'S CUSTOM CARTONING REQUIREMENTS.**

**THIS DESIGN SIGNIFIES A NEW CLASS OF CARTONING MACHINERY.**

**THIS CUSTOM BUILT PMP HANDLOAD CARTONER FEATURES 27 FEET OF INLINE HANDLOAD CAPABILITY.**

**THIS CUSTOM EXTENDED CARTONER IS ARGUABLY THE LONGEST VERTICAL CARTONER EVER BUILT!**

**\*THE CARTONER CAN ALSO BE CONFIGURED AS A TRADITIONAL STYLE CARTONER PROVIDING OVER 50 FEET OF HANDLOAD AREA!**

**THE CHALLENGE:** Customer requires the ability to sequentially hand load multiple products into carton including integrated product supply bins.

**THE SOLUTION:** PMP designed and built an "inline" extended frame vertical hand load cartoner providing the capability for 9 inline operator stations. This inline approach allowed for the ability to install custom product bins at each of the hand load stations.

In addition to providing product inventory at each of the stations for the operators, the inline design allows for product replenishment from the back of the cartoner away from the operators and without interrupting machine operation.

**CUSTOM LENGTH HAND LOAD STATIONS CAN BE CUSTOM CONFIGURED TO YOUR REQUIREMENTS FROM 4 to 27 FEET!**

**PMP MODEL CVHL IL EXTENDED LENGTH HANDLOAD CARTONERS INCLUDE THE FOLLOWING STANDARD FEATURES:**

- Custom hand loading area for multiple personnel.
- Rock Solid Heavy-Duty Welded Frame, No Flexing No Bowing Here!
- Superior Main Drive Timing and Reliability Delivered By Direct Drive Shafts and Gearing. Prolonged service life, minimal maintenance
- High Speed Carton Set Up Delivered by Rotary Carton Feeder.
- Carton Size Changes – Fast, Repeatable Changeovers with minimal machine adjustments required.
- Continuous motion with adjustable speed range. (Allen-Bradley AC Drive.)
- Durable carton transport blocks.
- Precision Machined Carton Pockets that transport cartons consistently throughout machine operations.
- 6" Powered Carton Magazine - Large capacity, easy to load with "On Demand" carton feed up technology.
- All product contact surfaces are stainless steel or plated finish.
- Easy to set up and maintain.
- Carton Flap Folding for Standard Seal End Carton. (Other Folding Options Available.)
- Painted Components are PMP White. (Other coatings and colors available.)
- Right Hand - Counter Clockwise Rotation.
- Minimal adjustments and maintenance.
